'OM NIWAS', Alsi Plots, Opp. Central Jail, Akola-444001

EDUCATION

Bachelor of Tech in Artificial Intelligence and Data Science **Mumbai, India**
Thadomal Shahani Engineering College *July 2021 – May 2025*

- **CGPA:** 8.24
- **Courses:** Data Structures & Algorithms, OOPs, Database Management, Artificial Intelligence.

Higher Secondary Certificate Examination **Akola, India**
Shri Dawale Junior College *Jun 2019 – Apr 2021*

- Percentage:95%

Secondary School Certificate Examination **Akola, India**
Mount Carmel High School *May 2019*

- Percentage:89.60%

EXPERIENCE

GRANT THORNTON BHARAT LLP **Mumbai**
Full Stack Developer Intern (Client: HDFC Bank) *Oct 2025- Present*

- **React.js + TypeScript**: Engineered multiple production-grade frontend screens for HDFC Bank's internal compliance platform, improving UI consistency and reducing page-load issues by ~30%.
- **Prisma (ORM) + PostgreSQL:** Created and optimized database schemas, executed relational queries, and improved data-fetch performance, reducing API response times by nearly 40%.
- **Access Control & Role Management:** applied secure, role-based permissions across dashboards, strengthening data integrity and reducing unauthorized access reports to zero.

CICADA GREEN CONSULTANTS PVT. LTD. **Remote**
Software Developer Intern *Dec 2024-Mar 2025*

- **Retrieval-Augmented Generation (RAG):** Integrated with OpenAI LLMs for NLP-driven generative AI chatbot, reducing response latency from 12s to 2–3s while enhancing accuracy of answers by ~40%.
- **Pinecone (Vector DB):** Migrated from Amazon OpenSearch to Pinecone for semantic retrieval, cutting context fetch time to sub-2s and boosting chatbot knowledge relevance by ~30%.
- **SQLAlchemy (Database ORM):** Optimized database interaction, reducing query execution time and boosting scalability.
- **Manim + Pydub:** Built an interactive multimedia quiz app with animated questions and synced audio, increasing learner engagement by ~35% and reducing manual syncing effort by ~70%.

PROJECTS

GHUMMO.AI ↗| Next.js, React, TypeScript, Convex, Clerk, Google Places

- **AI-Powered Trip Generation:** Built a full-stack AI travel planner that generates personalized day-by-day itineraries using generative AI, enabling users to create smart travel plans instantly.
- **Full-Stack SaaS Architecture:** Developed the application using Next.js and Convex backend with Clerk authentication, implementing secure user login, trip storage, and real-time data synchronization.
- **Performance, Security & Deployment:** Implemented rate limiting with Arcjet and deployed the production-ready app, ensuring scalability, security, and smooth performance for end users.

BUDGET BUDDY↗ | React.js, JavaScript, HTML, CSS, React Router, React-Toastify

- **React.js + Responsive Design:** Built a budget management single-page application (SPA) with React.js and React Router, delivering a mobile-friendly UI for creating, managing, and tracking personal budgets.
- **CRUD + State Management:** Implemented budget/expense CRUD functionality with local storage for persistent data, enabling seamless real-time updates and smooth user interaction.
- **Component-Based Architecture:** Designed reusable React components following frontend development best practices, improving scalability, maintainability, and UI/UX consistency.

SKILLS & INTERESTS

- **Programming Languages:** C, C++, Python
- **Web Development:** React.js, JavaScript, Typescript, HTML, CSS, Node.js
- **Databases:** MySQL, Vector Databases (Pinecone, Amazon OpenSearch), MongoDB, PostgreSQL
- **AI/ML:** Retrieval-Augmented Generation (RAG), OpenAI LLMs, NLP
- **Soft Skills:** Problem Solving, Attention to Detail, Leadership, Active Listener
- **Certifications:** 100 Days of Python (Udemy), The Complete Web Development Bootcamp 2024 (Udemy), Oracle Cloud Infrastructure 2025 Certified Generative AI Professional (Oracle), SQL and relational Databases 101 (IBM)
